# Change Management and System Adoption

Rita Mensurado co-CEO rita@skillsworkflow.com

Vasco Mensurado Head of Sales vasco@skillsworkflow.com

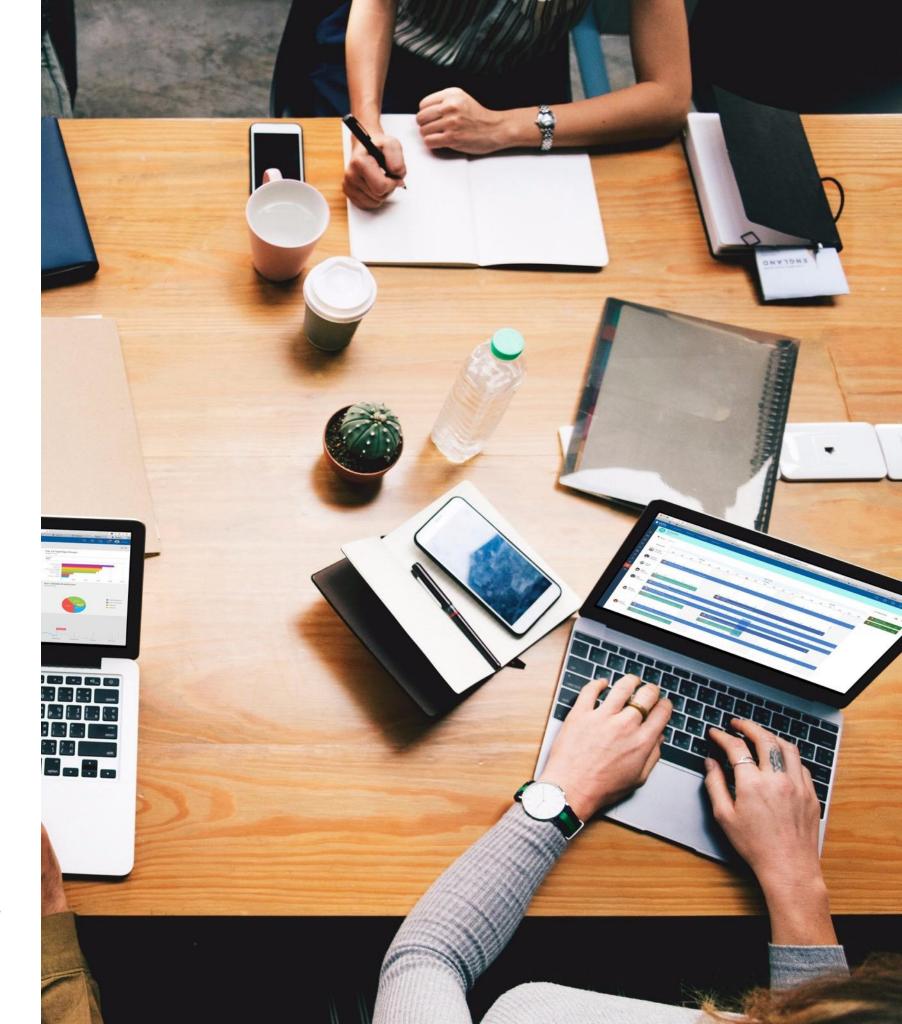

# Multiple Deployment Models

Project Planning, Discovery Phase, Onsite Support

Deployment Gantt: milestones, responsibilities
Discovery and GAP Analysis
Practice training sessions with Agency Data
Process flow charts and Workflow diagrams
Activation Campaign for Go-Live
Onsite PGL Support: One-on-One Sessions
Help Center with Videos and Articles

Confusion? Despair?! Deployments are so messy... All our deployments have a 0% casualty rate. Maybe, we have been lucky. We call it methodology. We hope that we'll keep on preserving life at our clients after deploying.

## **Best in Class Consultancy**

Our consultants and support are loved by our clients

**Proven methods and Processes** All major Languages (Product & Support) 24/7 Support Structure **Experienced team in Complex Rollouts** SOX / SOC / GDPR Compliant SLA grants top response speed **Dedicated Account Manager** Bi-weekly status meetings

Vanessa Regional Manager LATAM

It's all fun and games until you mess with Vanessa while she is dealing with a client...

**Loti** Project Manager APAC

When Loti is not doing Project Management, she could do more Project Management.

99

## Deployment Activities

Standard Timeline (~200 users)

# Support via Ticketing System

Resources available 24/7, speaking local language

Support team available 24/7 under SLA

Local support speaking local Language

Doubts, issues, enhancements tickets logged

Chat, Notifications, Approvals

Report and Dashboards Online

Online Help Center available to everyone

Change Requests and UAT's (SOX)

We know everyone at the agency: Partners, Security,

Infrastructure...

When something to be addressed we know who to talk to

Always online to fulfill your every need: 24/7, local, either chatting or issuing tickets, following up on requests, you name it.

### **Testimonials**

### What clients say about us

#### Publicis Worldwide

"We implemented other systems before, but none had the package of a good product with a very good team behind it. The attention they showed us, the flexibility, it felt like we have been working together for much longer. Thank you."

#### Goodby, Silverstein & Partners

"Making the experience of using Skills Workflow aligned with our brand identity is something we were looking forward too. Now it's here and it's just awesome."

#### IPG Interpublic

"Your team did an excellent job during the roll out of the Asia Pacific region. It was a tough assignment, with many countries coming online in a short period of time, all on time. Well done."

#### McCann Worldgroup

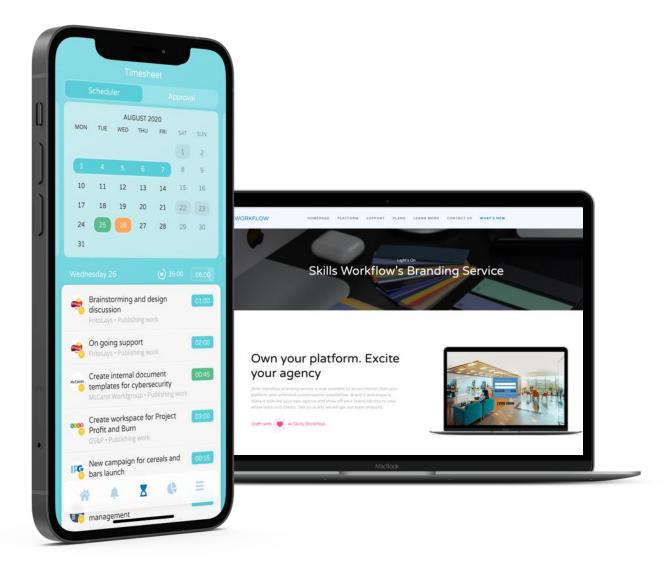

"That project you rolled out for us in Latam, all these countries, noone else could have done this"

# ADKAR Change Management Approach

Ensure that all your employees adapt to the new ways of working

- Awareness Communicate need for change Communicate benefits and risks of not adopting Skills through presentations, workshops, etc. tailored to different stakeholders groups.
- Desire Foster desire for change

  Address employee concerns, answer questions and highlight positive impacts.

  Share success stories, provide incentives, and involve key influencers.
- Knowledge Provide comprehensive training
  Provide resources to help employees gain the necessary knowledge to use
  Skills effectively, including hands-on training sessions, webinars, user guides...
- Ability Support application of new knowledge Support employees in applying newly acquired skills by offering ongoing assistance via a dedicated helpdesk, change champions, regular check-ins.
- Reinforcement Consult adoption reports
  Reinforce the change by reiterating benefits, celebrating successes, rewarding early adopters, and implementing improvements based on user feedback.

# Required Collaboration & Support

Key efforts required from various stakeholder groups

- Executive Sponsorship
  Communicate importance of change, allocate necessary resources
- People Managers Support
  Help address concerns or resistance from their teams
- Change Champions
  Advocate the project, share success stories, provide peer support
- 4 Cross-Functional Collaboration
  Encourage collaboration between different departments, teams
- End-User Involvement

  By gathering their feedback, addressing concerns, training them
- 6 IT Support
  Troubleshoot and handle technical aspects of the implementation

### Communication Plan

Ensure all stakeholders are informed and engaged

### Communication objectives

Create awareness about the need for change and Skills' benefits. Address concerns and build desire to adopt new system. Reinforce change.

### **Target Audiences**

Middle management / People Managers, Change champions, End-users, IT department, Cross-functional teams.

### **Key Messages**

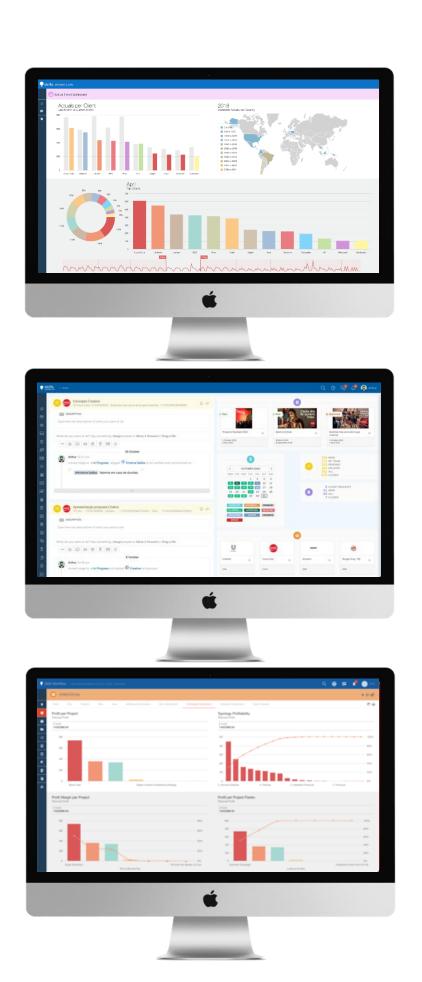

Rationale behind the change and alignment with organizational goals. Skills benefits for individuals, teams, and the organization as a whole. Implementation timeline and milestones. Available resources for employees during the transition.

#### **Communication Channels**

**Email** updates and progress reports. **Dedicated portal** with resources, FAQs, and user guides. **Information sessions** for different stakeholder groups. **Interactive sessions** to address concerns and provide hands-on training. **Feedback Surveys** for everyone to share thoughts and concerns.

### Communication Schedule

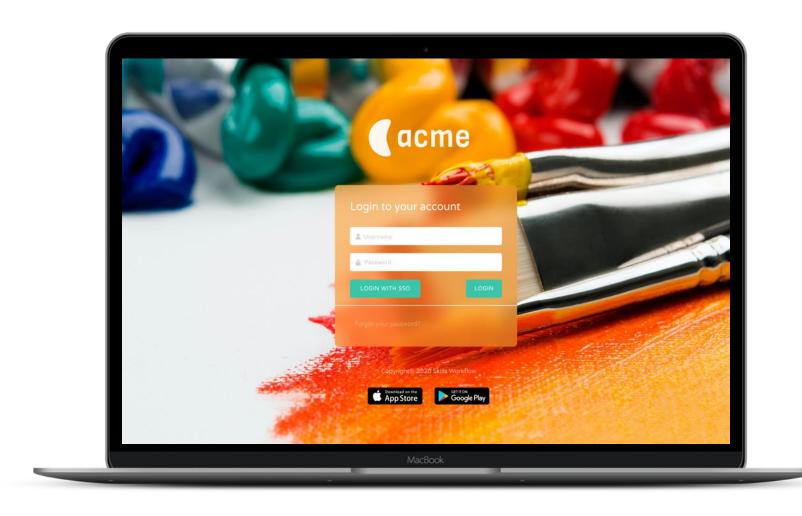

**Pre-implementation:** Introduce the change initiative, communicate the rationale, share the timeline. **During Implementation:** Provide regular progress updates, offer training, address concerns. **Post-implementation:** Share success stories, gather feedback, reinforce change.

# Branding

Connecting people to the system

Company Logo
Company's Colors
Login with entry image for Company
Terminology of Company
Horizontal integration with other Company's Sites

Your brand all over the place. A platform that looks like your company and feels like your company. The company's culture projected to everyone: staff, suppliers, clients. On the computers, phones and watches.

## Timesheet Blocking Mechanism

Improving accuracy and enforcing deadlines

Time must be entered daily or weekly

Company or individual tolerance (in days) is defined

Automatic notifications on Timesheet Delays

Blocking mechanism actioned when tolerance is over

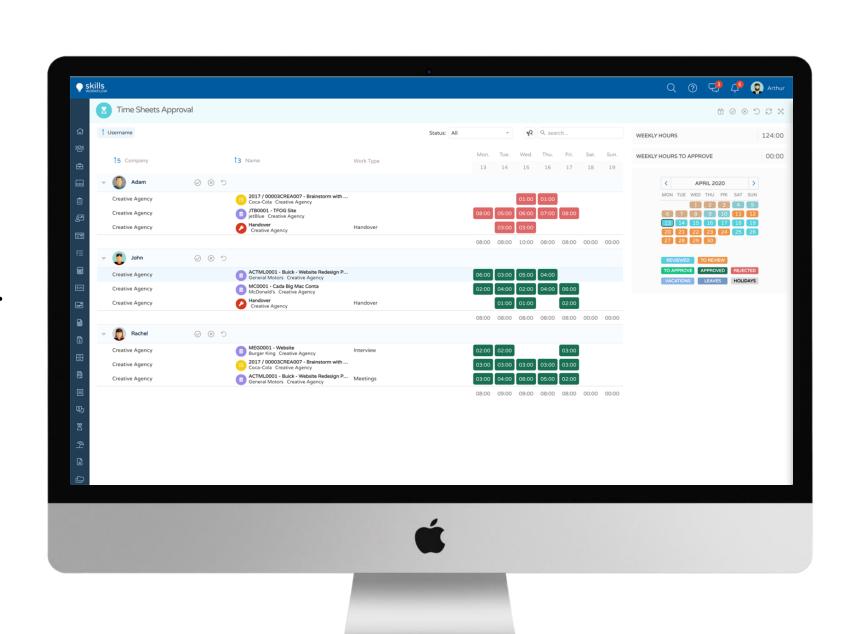

Stops all activities until Timesheets are complete

Blocking can be added to email & other tools

Blocking can be applied to Time Approvals as well

Customisable Reports & Dashboards on Timesheets

Why do people need to key in their time manually? Every time they comment, upload files, move the workflow, timesheet is automatically created for them. Artificial Intelligence on the benefit of Timesheet entry...

### Client Access Overview

Elevate Client-Agency Collaboration and foster Adoption

### The Future

The future of long status emails and meetings is inviting the client into the agency management tool to collaborate.

### **Unlimited Client Users**

Create unlimited client accounts and choose exactly what should be shared with each client user. With granular user permissions, access is provided without sharing any sensitive information.

### **Client Views**

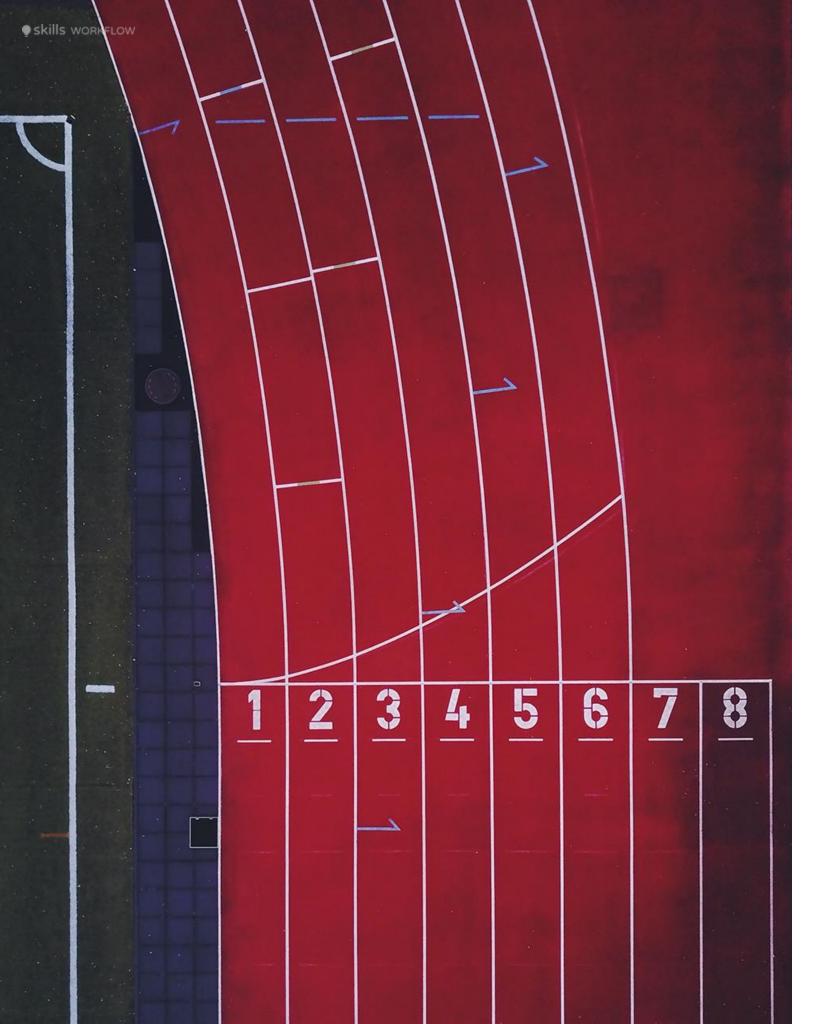

Clients have their own login to live dashboards where they can access all their data in real-time. The system provides tools and features for the Client's needs, as part of the standard Platform.

#### **Custom Client Portals**

For each client, we can design a unique experience integrated with the agency processes.

# Benefits of an Integrated Platform

Skills Workflow has Direct Impact on the Pain Points

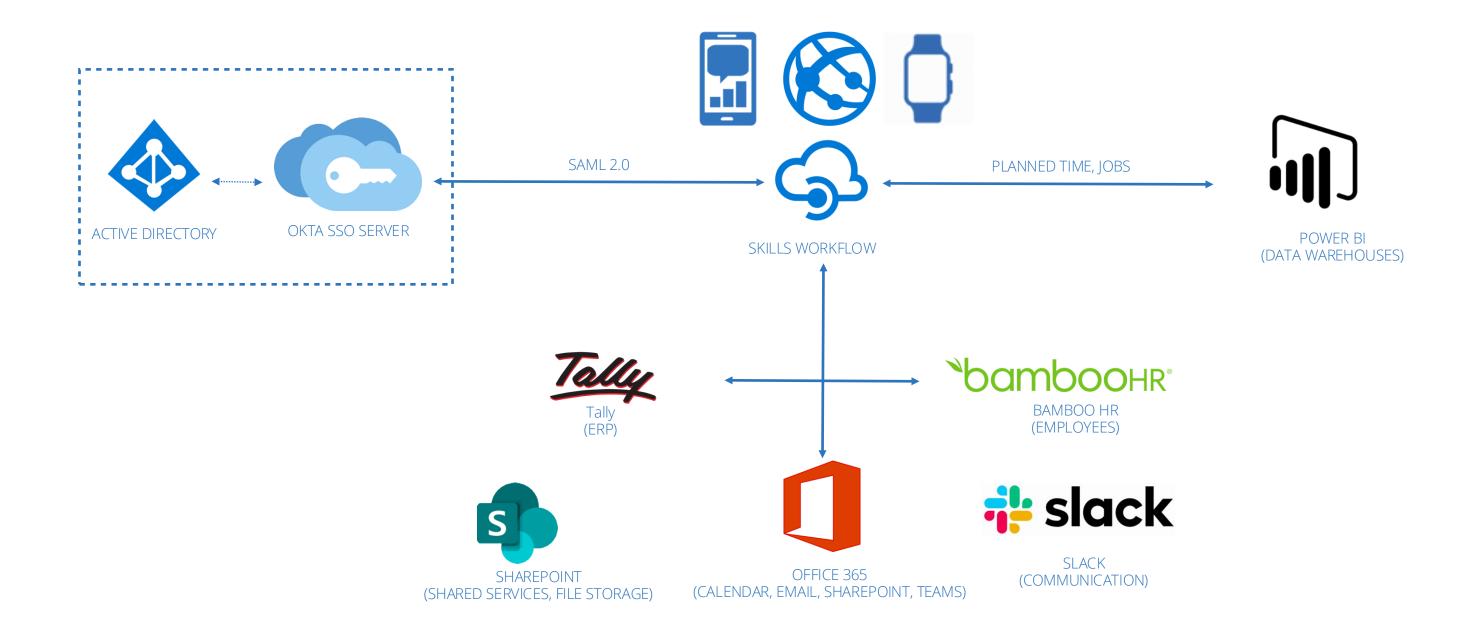

- Reduce Communication Overhead

  By centralizing information or knowledge in a shared system
- 2 Understand Project Costs
  By connecting time and project execution at-a-glance
- By focusing individual's work on big picture
- Organization Efficiency

  By adding total control, setting culture and automating processes
- Deliver Products on Time, Every Time
  By avoiding surprises with warnings on priorities, overbook, etc.
- Eliminate duplication of work
  Remove duplicated data entry, eliminate errors, improve accuracy

# Tools Landscape Example

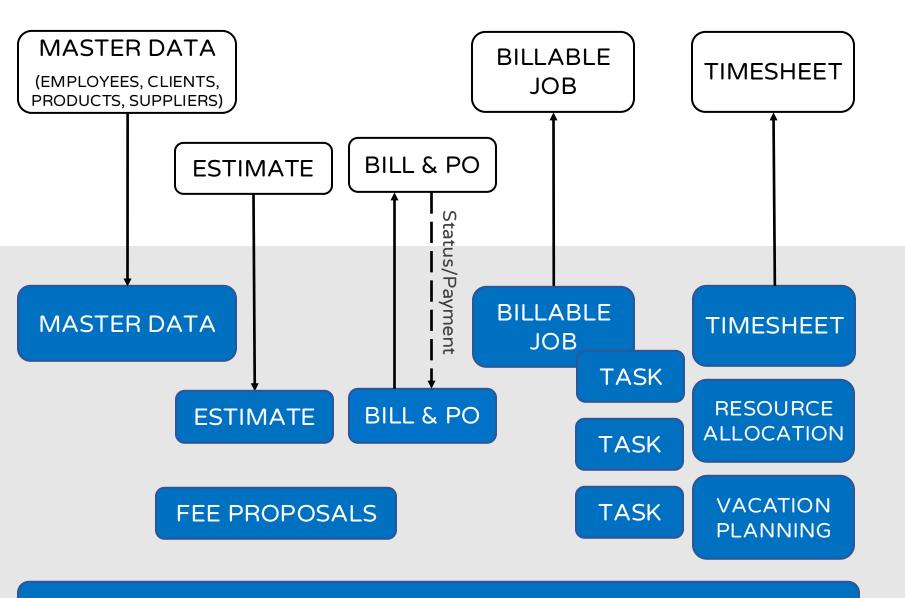

ERP, Timesheet, Leaves, Expenses, Attendance, Dashboards, HR

# **ERP Integration Example**

Content Shared with ERP

**ERP** 

**DASHBOARDS** 

- 1 ERP Addresses Control
- 2 Centralized Time, Billable Jobs and Estimates in ERP
- 3 ERP as Source of Reporting
- 4 Manage Projects with Dashboards
- 5 Plan Resources Capacity and Use
- 6 Automate Processes with Workflows
- 7 Communicate, Chat and Get Notified

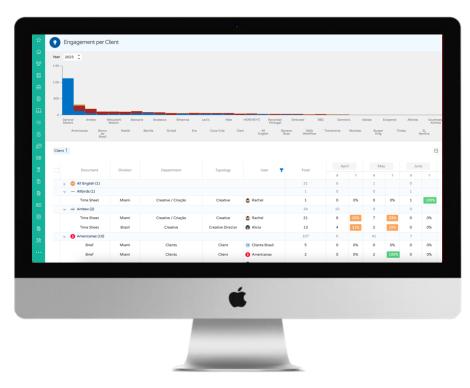

SKILLS WORKFLOW

# Measuring Engagement

Company engagement is driven by individual engagement

### Organization

Monitor activity level each month across all departments and all modules and identify areas for improvement

#### Team

Understand how the different teams are adapting to the new system and ensure their specific needs are covered

#### Individual

Find and reward champion users, they are the drivers of change. Identify users that may need more help and support

Why look for answers in a ton of data? A real automated assistant can alert you on what problem you should be solving. Don't try to find problems by looking at massive databases. Relax, sit down and let your assistant call you for a decision.

### Thank You!
